SUMMARY:

The building is constructed of steel, slab on grade, attractively designed and is finished on both the exterior and interior.

The Property was designed and specifically built as a biomedical research and development facility that includes animal housing. Fire suppression system in two computer rooms as well as oxygen lines.

The office space has high end finishes to include slate entry way, maple trim, solid core doors, recessed fluorescent lighting. The office space is well designed and includes built-in cabinets and a kitchen/lunch room.

There is paved parking, access for deliveries and there is parking for approximately 40 spaces. There is one (1) standard drive-in bay and one (1) double service door. The clear height is 12 feet in the warehouse section.

The building has heavy power, controlled card access system, central-air and a humidifier system permitting excellent air control.

There is 8,375 square feet of research/lab space includes four operating rooms, lab spaces as well as meeting and storage rooms.

There are three animal housing- kenneled areas consisting of 18,725 s.f. and was specifically finished to accommodate animal housing and their well-being. Each of the areas is located off of a central common area corridor and is accessed by a controlled entry card system. The flooring in these areas are at a gradual sloping towards the walls of 6" for drainage. There is substantial plumbing and an air-exchange system in these sections.
