Description from an 2016 appraisal report :

The building's interior is essentially demised into five sections. The first floor entrance opens to a waiting and reception area. To the left is a main dining room and further left is a private function room. They are serviced by two (men's and women's) multi-stall handicap accessible bathroom. To the right is a bar and a separate lounge area, also served by another set of men's and women's multi-stall handicap accessible bathrooms.

The finishes in these areas include newly installed commercial grade carpet, some ceramic tile in hallways and hardwood flooring in the function room. The walls are predominantly maple paneling with areas of painted sheetrock or plaster. The ceilings are primarily painted sheetrock, with some suspended acoustical tile in the bar area. The lighting is a mix of ceiling mounted incandescent fixtures and some fluorescent.

Behind the dining areas is a very large kitchen consisting of three areas used for cooking, food prep and storage. Inside this area are a series of walk-in coolers and freezers. The finishes include terrazzo tile flooring and sheet aluminum walls and ceilings in most areas.

On the second floor is a medium size storage room used for dry goods, an employee locker room and bathroom and an executive office area with a private bathroom with shower. Finishes include a mix of carpet and vinyl tile floors and predominantly painted sheetrock walls and ceilings with some wood paneling walls

Improvements:

According to assessor's records, the building was constructed in 1970. The building is predominantly single story with a small second floor. The total building area is 9,280 square feet with the first floor having 7,690 square feet and the second floor having 1,590 square feet. It appears to have been previously built as a smaller building and added to in 1970.

It is built on a concrete foundation, slab on grade with a mix of masonry, steel and wood frame walls and roof. The exterior is predominantly brick with a newly sided area of decorative stone on the front gable. The second floor is vinyl sided, and the rear of the building is a combination of vinyl siding and exposed concrete block. The single story portion of the building has a newly installed asphalt shingle roof on the gable section. The left and right sides have a rather shallow pitch and a new rubber membrane was being installed on these sections at the time of inspection and appeared to be well over 50% complete. All of the masonry siding was observed to be in good overall condition.

Easement:

According to the legal description, there is no easement listed. However, the owner stated that a sewer line runs from the adjacent 99 Restaurant to the west, through the subject parking lot and connects with Kennedy Road. This area is currently used as parking and the location of this is considered non-adverse.
